WORK EXPERIENCE

Software Developer
Strategy Co. Global ⬈

01/2024 - Present

Tasks

- Developed multi-access level dashboard in **react 18.1.0** with complex Mongo query in the **mono repo (with turbo) setup** to Simplify dependency management.
- Integrate **cron jobs** to improve backend efficiency and handle bulk operations in the background.
- Transfer complete application from **react 16.12.0 to 18.1.0**, with better architecture, and remove redemand code to made build size less than 500MB (recommend by react).
- **Establish global style variable** and upgrade old styling implementation.

Full Stack Developer
Attryb tech ⬈

03/2023 - 01/2024

Tasks

- **Deployed** custom **UI Library on npm** with **implemented CI/CD pipelines**, automating the testing and deployment processes.
- Using both **MongoDB** and **PostgreSQL** databases for different types of data and use cases, reducing data retrieval times by 30%.
- Resolved critical technical issues in real-time, **increasing the conversion rate** of brands like tarinika, Zandu Care, and Ashba that have customers over 1 million.
- Implemented a centralized state management system (**Redux Toolkit Thunk**) to handle complex application state and ensure seamless user experiences effectively.
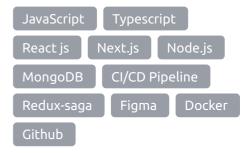

Web Developer
Kidaura ⬈

08/2022 - 02/2022

Tasks

- Built custom Hook's using **chakra UI** to minimize load on server,
- Work on **GraphQL query** and mutation in server side rendering,
- Create pixel perfect figma UI/UX design in NextJs,

EDUCATION

Bachlor of Engineering
JECRC Foundation

07/2017 - 10/2021   *72.4%*

SKILLS

JavaScript Typescript React js Next.js Node.js MongoDB CI/CD Pipeline Redux-saga Figma Docker Github

PERSONAL PROJECTS

Image Sensai ⬈

- Generating Image through **generative AI.**
- State managment in **React Js** and using **Tailwind CSS** to give clean UI.
- Integrated Openai Api **(dall-e-3),** using the **response format parameter** . URLs will expire after an hour.

Crypto Check ⬈

- Check market of all 100+ crypto coins using **Coingecko Api.**
- **React** to manage state, and use **Axios** for XML-Http-Requests.
- Improve page performance up to 50% by virtual DOM.
- Use **Recharts** library for graphs in react.

My Lens ⬈

- **Next JS** & React component for state management
- **Authentication** by firebase & **firestore** for database
- Styling by **tailwind CSS** and react icons

COURSE

Full-Stack Devlopment
 (03/2022 - 12/2022)

Built and developed full-stack web applications using MERN stack. Participate in various DSA contests.
